QUESTIONS? Call 1-800-228-4722**

FIRST AID	
Have label with you when obtaining treatment advice. In case of emergency, call toll free 1-800-338-6167.	
If swallowed by human, pet or animal	Immediately call 1-800-338-6167 to speak to a medical or veterinary professional. Assistance is available 24hr/day.
NOTE TO PHYSICIAN AND VETERINARIAN	
Contains the anticoagulant Brodifacoum. If swallowed, this material may reduce clotting ability of the blood and cause bleeding. For humans or animals ingesting bait and/or showing poisoning signs (bleeding or elevated prothrombin times), Vitamin K1 is the antidote.	

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND PETS

CAUTION: May be harmful or fatal if swallowed. This product may reduce the clotting ability of the blood and cause bleeding.

ENVIRONMENTAL HAZARDS: This product is toxic to fish, birds and wildlife. NEVER APPLY OUTDOORS. Poisoned rodents can be harmful to predators. Do not apply directly to water.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

DO NOT USE OR STORE

✕ WHERE CHILDREN
OR PETS CAN REACH!

✕ OUTDOORS!

✕ NEAR HUMAN
OR ANIMAL FOOD!

Steps to Effective Home Rodent Control

An overall program to eliminate mice and keep them from returning:

STEP 1: PLAN and PREPARE:

- Eliminate Food Sources: remove garbage, food, and other materials that can shelter or feed mice.
- Keep mice out: Seal cracks and openings in building and walls where mice can get in especially openings in walls, gaps around plumbing and fixtures, and any cracks or seams in the building's foundation.

STEP 2: SELECT THE RIGHT PRODUCT

Use d-CON snap and glue traps in the kitchen, bathroom, bedroom, and living rooms areas where traps can be safely placed.

Use d-CON baits in the attic, behind appliances, and out of reach spaces in basement, garage, and shed. For the rooms your family spends the LEAST time in: Use d-CON baits in the attic, behind appliances, and out of reach spaces in basement, garage, and shed.

STEP 3: APPLY PRODUCT

Always wear gloves when handling bait. Place about 8 to 12 feet apart behind appliances, heavy furniture, in attics and crawl spaces, and other concealed places where house mice are active. **DO NOT** use in areas that children or pets can reach.

STEP 4: MONITOR

If packets are not touched after 3 days, then move them to a new area where mice are active. Once the mice start eating the bait, maintain a supply for 7 days. Then, remove any uneaten bait and dispose according to directions.

Repeat application after 7 days if mice are still present.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal.

PESTICIDE STORAGE: Store only in original container, in a dry place inaccessible to children and pets and away from human and pet food.

PESTICIDE DISPOSAL AND CONTAINER HANDLING: Nonrefillable container. Do not reuse or refill this container. **If empty:** Place in trash or offer for recycling if available. **If partly filled:** Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.

NOTICE TO BUYER AND USER: To the extent consistent with applicable law, Buyer and User assume all responsibility for safety and risk associated with any use not in accordance with directions. SELLER SHALL NOT BE LIABLE FOR CONSEQUENTIAL, SPECIAL OR INDIRECT DAMAGES RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT AND SELLER'S SOLE LIABILITY AND BUYER'S AND USER'S EXCLUSIVE REMEDY SHALL BE LIMITED TO THE REFUND OF THE PURCHASE PRICE.

Repeat application after 7 days if mice are still present.

~~**READ THIS LABEL:** Read this entire label and follow all use directions and use precautions. Use only for the sites, pests, and application methods described on this label.~~

USE RESTRICTIONS:

~~**THIS IS NOT A TAMPER-PROOF OR TAMPER RESISTANT BAIT STATION. DO NOT USE THIS PRODUCT IN AREAS ACCESSIBLE TO CHILDREN, PETS, DOMESTIC ANIMALS, OR NONTARGET WILDLIFE. DO NOT USE THIS PRODUCT OUTDOORS.**~~

~~This product may only be used to control house mice in homes, industrial, commercial, agricultural and public buildings. Do not place bait in areas where there is a possibility of contaminating food or surfaces that come in direct contact with food. Do not broadcast bait.~~

~~**SELECTION OF TREATMENT AREAS:** Wedges of Mouse Prufe II may be placed indoors along walls, in corners and in concealed places where house mice are active and where children, nontarget mammals and birds will not be exposed to the bait.~~

APPLICATION DIRECTIONS:

~~While wearing gloves, place wedge in horizontal position. Pull tab, lift and twist off. Space wedges at intervals of 8 to 12 feet if house mouse activity is not highly localized and placements can be made in areas not accessible to children and nontarget animals. While wearing gloves replace wedges as their contents are consumed. Wedges not touched after 3 days should be moved to new locations appropriate for bait placements (see **USE RESTRICTIONS:**) if house mouse activity persists. Maintain a supply of fresh bait for at least 15 days. Collect and dispose of all dead animals and leftover bait properly.~~

PRECAUTIONARY STATEMENTS:

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: May be harmful or fatal if swallowed. This material may reduce the clotting ability of the blood and cause bleeding. Wash hands after handling bait.

FIRST AID

Have label with you when obtaining treatment advice.

If swallowed by human

- Call a Poison Control Center, doctor, or 1-800-228-4722 immediately for treatment advice.
- Do not induce vomiting unless told to do so by the poison control center or doctor.

If swallowed by pet or animal

- Call a veterinarian immediately for treatment advice.

NOTE TO PHYSICIAN AND VETERINARIAN

This product may reduce the clotting ability of the blood and cause hemorrhaging. The anticoagulant action of this product may produce prolonged prothrombin times for 20 to 30 days after exposure. If poisoning occurs, intramuscular and oral administration of Vitamin K₁ are indicated, as in poisoning from overdose of dicumarol (bishydroxy coumarin). **FOR HUMAN CASES:** Vitamin K₁ is antidotal at doses of 10 to 20 mg (not mg/kg). Repeated treatments may need to be given for up to 30 days (based on monitoring of prothrombin times). In severe cases, blood transfusions may be necessary. **FOR ANIMAL CASES:** Vitamin K₁ is antidotal at 5 mg/kg intramuscularly. Oral Vitamin K₁ should be given for up to 30 days at 5 mg/kg (based on monitoring of prothrombin times). In severe cases blood transfusions may be necessary.

ENVIRONMENTAL HAZARDS: This product is toxic to fish, birds and wildlife. This product can pose a secondary hazard to birds of prey and mammals. Do not apply directly to water.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal.

PESTICIDE STORAGE: Store only in original container, in a dry place inaccessible to children and pets and away from human and pet food.

PESTICIDE DISPOSAL AND CONTAINER HANDLING: Nonrefillable container. Do not reuse or refill this container. **If empty:** Place in trash or offer for recycling if available. **If partly filled:** Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.

NOTICE TO BUYER AND USER: To the extent consistent with applicable law, Buyer and User assume all responsibility for safety and risk associated with any use not in accordance with directions. SELLER SHALL NOT BE LIABLE FOR CONSEQUENTIAL, SPECIAL OR INDIRECT DAMAGES RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT AND SELLER'S SOLE LIABILITY AND BUYER'S AND USER'S EXCLUSIVE REMEDY SHALL BE LIMITED TO THE REFUND OF THE PURCHASE PRICE.

Re: d-CON Mouse Prufe II (EPA Reg. No. 3282-65); d-CON Bait Pellets (EPA Reg. No. 3282-66); d-CON Bait Pellets II (EPA Reg. No. 3282-74); d-CON Ready Mixed Baitbits (EPA Reg. No. 3282-81)

Fast-track label amendments to simplify directions for use, precautionary statements, and other language

Dear Mr. Hebert:

With this letter, Reckitt Benckiser (Reckitt) is submitting fast track label amendments for the above referenced products (four products). These label amendments are to revise the labeling to make the labels simple and easy to read and understand. These changes will further reduce the opportunities for accidental exposures to children, pets and non-target wildlife from these products, thus addressing the concerns EPA identified in the Agency's Draft Notice of Intent to Cancel dated November 2, 2012, and rendering a final Notice of Intent to Cancel unnecessary. Accordingly, I am also requesting that these label amendments be approved with the requested changes, in accordance with 40 CFR §152.112, without conditions or limitations and on an expedited basis. If the Agency does not intend to approve these amendments without conditions, we ask that you notify us immediately and in writing in accordance with 40 CFR §152.118.

Lastly, all sublabels have been combined into one master label to remove the redundancy in the previously approved label versions.

You will find the following included with this amendment:

- 1) Amendment application form,
- 2) One redline version of the proposed label, and
- 3) One clean version of the proposed label.

Please do not hesitate to contact me with any questions and/or concerns at (973) 404-2995 or via e-mail: heather.bjornson@rb.com.

Sincerely,

Heather R. Bjornson
Senior Regulatory Associate

Fast-track label amendments to simplify directions for use, precautionary statements, and other language

Dear Mr. Hebert:

With this letter, Reckitt Benckiser (Reckitt) is submitting fast track label amendments for the above referenced products (four products). These label amendments are to revise the labeling to make the labels simple and easy to read and understand. These changes will further reduce the opportunities for accidental exposures to children, pets and non-target wildlife from these products, thus addressing the concerns EPA identified in the Agency's Draft Notice of Intent to Cancel dated November 2, 2012, and rendering a final Notice of Intent to Cancel unnecessary. Accordingly, I am also requesting that these label amendments be approved with the requested changes, in accordance with 40 CFR §152.112, without conditions or limitations and on an expedited basis. If the Agency does not intend to approve these amendments without conditions, we ask that you notify us immediately and in writing in accordance with 40 CFR §152.118.

Lastly, all sublabels have been combined into one master label to remove the redundancy in the previously approved label versions.

You will find the following included with this amendment:

- 1) Amendment application form,
- 2) One redline version of the proposed label, and
- 3) One clean version of the proposed label.

Please do not hesitate to contact me with any questions and/or concerns at (973) 404-2995 or via e-mail: heather.bjornson@rb.com.

Sincerely,

Heather R. Bjornson
Senior Regulatory Associate

FIRST AID	
Have label with you when obtaining treatment advice. In case of emergency, call toll free 1-800-338-6167.	
If swallowed by human, pet or animal	Immediately call 1-800-338-6167 to speak to a medical or veterinary professional. Assistance is available 24 hr/day.
NOTE TO PHYSICIAN AND VETERINARIAN	
Contains the anticoagulant Brodifacoum. For humans or animals that have ingested bait and/or are showing poisoning signs (bleeding or elevated prothrombin times), Vitamin K1 is antidotal.	

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND PETS

CAUTION: May be harmful or fatal if swallowed. This material may reduce the clotting ability of the blood and cause bleeding.

ENVIRONMENTAL HAZARDS

This product is toxic to fish, birds and wildlife. NEVER APPLY OUTDOORS. Poisoned rodents can be harmful to predators. Do not apply directly to water.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

DO NOT USE OR STORE

*** WHERE CHILDREN
OR PETS CAN REACH!**

*** OUTDOORS!**

*** NEAR HUMAN
OR ANIMAL FOOD!**

4 Steps to Effective Home Rodent Control

An overall program to eliminate mice and keep them from returning:

STEP 1: PLAN and PREPARE:

- Eliminate Food Sources: remove garbage, food, and other materials that can shelter or feed mice.
- Keep mice (and rats) out: Seal cracks and openings in building and walls where mice can get in especially openings in walls, gaps around plumbing and fixtures, and any cracks or seams in the building's foundation.

STEP 2: SELECT THE RIGHT PRODUCT

Use d-CON snap and glue traps in the kitchen, bathroom, bedroom, and living rooms areas where traps can be safely placed.

Use d-CON baits in the attic, behind appliances, and out of reach spaces in basement, garage, and shed. For the rooms your family spends the LEAST time in: Use d-CON baits in the attic, behind appliances, and out of reach spaces in basement, garage, and shed.

STEP 3: APPLY PRODUCT

Always wear gloves when handling bait. Place about 8 to 12 feet apart behind appliances, heavy furniture, in attics and crawl spaces, and other concealed places where house mice (and rats) are active.

DO NOT use in areas that children or pets can reach.

STEP 4: MONITOR

If packets are not touched after 3 days, then move them to a new area where mice (or rats) are active. Once the mice (or rats) start eating the bait, maintain a supply for 7 days. Then, remove any uneaten bait and dispose according to directions.

Repeat application after 7 days if mice (or rats) are still present.

STORAGE AND DISPOSAL

Do not contaminate water, food, feed by storage or disposal.

PESTICIDE STORAGE: Store only in original container, in a dry place inaccessible that is out of reach of children and pets and away from human and pet food.

PESTICIDE DISPOSAL AND CONTAINER HANDLING: Non-refillable container. Do not reuse or refill container. **If empty:** Place in trash or offer for recycling if available. **If partly filled:** Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.

NOTICE TO BUYER AND USER: To the extent consistent with applicable law, Buyer and User assume all responsibility for safety and risk associated with any use not in accordance with directions. SELLER SHALL NOT BE LIABLE FOR CONSEQUENTIAL, SPECIAL OR INDIRECT DAMAGES RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT AND SELLER'S SOLE LIABILITY AND BUYER'S AND USER'S EXCLUSIVE REMEDY SHALL BE LIMITED TO THE REFUND OF THE PURCHASE PRICE.

If swallowed by human, pet or animal	Immediately call 1-800-338-6167 to speak to a medical or veterinary professional. Assistance is available 24hr/day.
NOTE TO PHYSICIAN AND VETERINARIAN	
Contains the anticoagulant Brodifacoum. If swallowed, this material may reduce clotting ability of the blood and cause bleeding. For humans or animals ingesting bait and/or showing poisoning signs (bleeding or elevated prothrombin times), Vitamin K1 is the antidote.	

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND PETS

CAUTION: May be harmful or fatal if swallowed. This product may reduce the clotting ability of the blood and cause bleeding.

ENVIRONMENTAL HAZARDS: This product is toxic to fish, birds and wildlife. NEVER APPLY OUTDOORS. Poisoned rodents can be harmful to predators. Do not apply directly to water.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

DO NOT USE OR STORE

**✗ WHERE CHILDREN
OR PETS CAN REACH!**

✗ OUTDOORS!

**✗ NEAR HUMAN
OR ANIMAL FOOD!**

{FINAL PRINTED LABEL TO INCLUDE PICTOGRAMS SHOWING PROPER PLACEMENT INDOORS, BEHIND APPLIANCES, IN ATTICS AND OTHER PLACES WHERE CHILDREN AND PETS DO NOT HAVE ACCESS}

Steps to Effective Home Rodent Control

An overall program to eliminate mice and keep them from returning:

STEP 1: PLAN and PREPARE:

- Eliminate Food Sources: remove garbage, food, and other materials that can shelter or feed mice.
- Keep mice (and rats) out: Seal cracks and openings in building and walls where mice (and rats) can get in especially openings in walls, gaps around plumbing and fixtures, and any cracks or seams in the building's foundation.

STEP 2: SELECT THE RIGHT PRODUCT

Use d-CON snap and glue traps in the kitchen, bathroom, bedroom, and living rooms areas where traps can be safely placed.

Use d-CON baits in the attic, behind appliances, and out of reach spaces in basement, garage, and shed. For the rooms your family spends the LEAST time in: Use d-CON baits in the attic, behind appliances, and out of reach spaces in basement, garage, and shed.

STEP 3: APPLY PRODUCT

Always wear gloves when handling bait. Place about 8 to 12 feet apart behind appliances, heavy furniture, in attics and crawl spaces, and other concealed places where house mice (and rats) are active. **DO NOT** use in areas that children or pets can reach.

STEP 4: MONITOR

If packets are not touched after 3 days, then move them to a new area where mice (or rats) are active. Once the mice (or rats) start eating the bait, maintain a supply for 7 days. Then, remove any uneaten bait and dispose according to directions.

Repeat application after 7 days if mice (or rats) are still present.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal.

PESTICIDE STORAGE: Store only in original container, in a dry place that is out of the reach of children and pets and away from human and pet food.

PESTICIDE DISPOSAL AND CONTAINER HANDLING: Non-refillable container. Do not reuse or refill container. **If empty:** Place in trash or offer for recycling if available. **If partly filled:** Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.

NOTICE TO BUYER AND USER: Seller warrants that this product conforms to the chemical description on the label and is reasonably fit for the purpose stated on the label when used in accordance with directions under normal conditions of use. This warranty does not extend to the use of this product contrary to label instructions, or under abnormal use conditions, or under conditions not reasonable foreseeable to Seller, and Buyer and User assumes the risk of any such use.

SELLER DISCLAIMS ALL OTHER WARRANTIES EXPRESSED OR IMPLIED INCLUDING ANY WARRANTY OR FITNESS OR MERCHANTABILITY. SELLER SHALL NOT BE LIABLE FOR CONSEQUENTIAL, SPECIAL OR INDIRECT DAMAGES RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT AND SELLER'S SOLE LIABILITY AND BUYER'S AND USER'S EXCLUSIVE REMEDY SHALL BE LIMITED TO THE REFUND OF THE PURCHASE PRICE.

Fast-track label amendments to simplify directions for use, precautionary statements, and other language

Dear Mr. Hebert:

With this letter, Reckitt Benckiser (Reckitt) is submitting fast track label amendments for the above referenced products (four products). These label amendments are to revise the labeling to make the labels simple and easy to read and understand. These changes will further reduce the opportunities for accidental exposures to children, pets and non-target wildlife from these products, thus addressing the concerns EPA identified in the Agency's Draft Notice of Intent to Cancel dated November 2, 2012, and rendering a final Notice of Intent to Cancel unnecessary. Accordingly, I am also requesting that these label amendments be approved with the requested changes, in accordance with 40 CFR §152.112, without conditions or limitations and on an expedited basis. If the Agency does not intend to approve these amendments without conditions, we ask that you notify us immediately and in writing in accordance with 40 CFR §152.118.

Lastly, all sublabels have been combined into one master label to remove the redundancy in the previously approved label versions.

You will find the following included with this amendment:

- 1) Amendment application form,
- 2) One redline version of the proposed label, and
- 3) One clean version of the proposed label.

Please do not hesitate to contact me with any questions and/or concerns at (973) 404-2995 or via e-mail: heather.bjornson@rb.com.

Sincerely,

Heather R. Bjornson
Senior Regulatory Associate

~~READ THIS LABEL:~~ Read this entire label and follow all use directions and use precautions.

USE RESTRICTIONS:

**~~THIS IS NOT A TAMPER-PROOF OR TAMPER-RESISTANT BAIT STATION. DO NOT USE THIS
PRODUCT IN AREAS ACCESSABLE TO CHILDREN, PETS, DOMESTIC ANIMALS, OR
NONTARGET WILDLIFE. DO NOT USE THIS PRODUCT OUTDOORS.~~**

~~This product may only be used to control house mice in homes, industrial, commercial, agricultural and public buildings. Do not place bait in areas where there is a possibility of contaminating food or surfaces that come in direct contact with food. Do not broadcast bait.~~

~~SELECTION OF TREATMENT AREAS:~~ Wedges of d-CON® Mouse-Prufe III may be placed along walls, in corners, and in concealed places where mice are active and where children under six years of age, nontarget mammals, and birds will not be exposed to the bait.

~~APPLICATION DIRECTIONS:~~ Place wedge in horizontal position. Pull tab, lift and twist off. Space wedges at intervals of 8 to 12 feet if mouse activity is not highly localized and placements can be made in areas not accessible to children and nontarget animals. Replace wedges as their contents are consumed. Wedges not touched after 3 days should be moved to new locations appropriate for bait placements (see **USE RESTRICTIONS:**) if mouse activity persists. Maintain a supply of fresh bait for at least 15 days. Collect and dispose of all dead animals and leftover bait properly.

Steps to Effective Home Rodent Control

An overall program to eliminate house mice and keep them from returning:

STEP 1: PLAN and PREPARE:

- Eliminate Food Sources: remove garbage, food, and other materials that can shelter or feed mice.
- Keep mice out: Seal cracks and openings in building and walls where mice can get in especially openings in walls, gaps around plumbing and fixtures, and any cracks or seams in the building's foundation.

Re: d-CON® Mouse-Prufe III (EPA Reg. No. 3282-85); d-CON® Bait Pellets III (EPA Reg. No. 3282-86); d-CON® Ready Mixed Baitbits III (EPA Reg. No. 3282-87); d-CON® Bait Packs III (EPA Reg. No. 3282-88)

Fast-track label amendments to simplify directions for use, precautionary statements, and other language

Dear Mr. Hebert:

With this letter, Reckitt Benckiser (Reckitt) is submitting fast track label amendments for the above referenced products (four products). These label amendments are to revise the labeling to make the labels simple and easy to read and understand. These changes will further reduce the opportunities for accidental exposures to children, pets and non-target wildlife from these products, thus addressing the concerns EPA identified in the Agency's Draft Notice of Intent to Cancel dated November 2, 2012, and rendering a final Notice of Intent to Cancel unnecessary. Accordingly, I am also requesting that these label amendments be approved with the requested changes, in accordance with 40 CFR §152.112, without conditions or limitations and on an expedited basis. If the Agency does not intend to approve these amendments without conditions, we ask that you notify us immediately and in writing in accordance with 40 CFR §152.118.

Lastly, all sublabels have been combined into one master label to remove the redundancy in the previously approved label versions.

You will find the following included with this amendment:

- 1) Amendment application form,
- 2) One redline version of the proposed label, and
- 3) One clean version of the proposed label.

Please do not hesitate to contact me with any questions and/or concerns at (973) 404-2995 or via e-mail: heather.bjornson@rb.com.

Sincerely,

Heather R. Bjornson
Senior Regulatory Associate

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

DO NOT USE OR STORE

**✗ WHERE CHILDREN
OR PETS CAN REACH!**

✗ OUTDOORS!

**✗ NEAR HUMAN
OR ANIMAL FOOD!**

**{FINAL PRINTED LABEL TO INCLUDE PICTOGRAMS SHOWING PROPER PLACEMENT INDOORS,
BEHIND APPLIANCES, IN ATTICS AND OTHER PLACES WHERE CHILDREN AND PETS DO NOT
HAVE ACCESS}**

READ THIS LABEL: Read this entire label and follow all use directions and use precautions.

IMPORTANT: Do not expose children, pets, or other nontarget animals to rodenticides. To help prevent accidents:

- 1. Store product not in use in a location out of reach of children and pets.**
- 2. Apply bait in locations out of reach of children, pets, domestic animals and nontarget wildlife, or in tamper-resistant bait stations. These stations must be resistant to destruction by children under six years of age and must be used in a manner that prevents such children from reaching into bait compartments and obtaining bait. If bait can be shaken from stations when they are lifted, units must be secured or otherwise immobilized. Even stronger bait stations are needed in areas open to hoofed livestock, raccoons, bears, other potentially destructive animals, or in areas prone to vandalism.**
- 3. Dispose of product container, and unused, spoiled, and unconsumed bait as specified on this label.**

USE RESTRICTIONS:

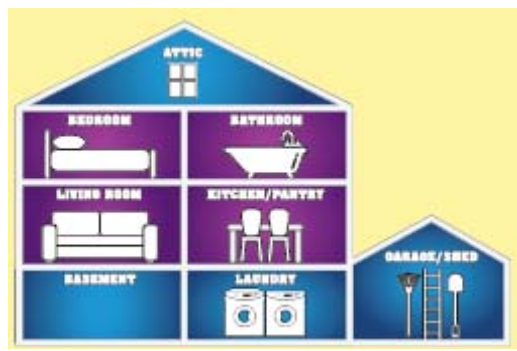

This product may only be used to control Norway Rats, Roof Rats and house mice only in the sites identified below.

- In **URBAN AREAS**, this product may only be used in and around homes; in and around industrial, commercial and public buildings; and in transport vehicles (ships, trains, aircraft) and in and around related port or terminal buildings. All applications "around" buildings must be made in tamper-resistant bait stations placed along the walls or other external parts of buildings (e.g. doorways, ramps, loading docks) where rats or mice might seek to gain entrance. Do not use in sewers.
- In **NON-URBAN AREAS**, this product may only be used inside of homes and agricultural buildings.

Do not place bait in areas where there is a possibility of contaminating food or surfaces that come in direct contact with food. Do not broadcast bait.

Steps to Effective Home Rodent Control

An overall program to eliminate house mice) (and) (rats) and keep them from returning:

STEP 1: PLAN and PREPARE:

- Eliminate Food Sources: remove garbage, food, and other materials that can shelter or feed mice.
- Keep (mice) (and) (rats) out: Seal cracks and openings in building and walls where (mice) (and) (rats) can get in especially openings in walls, gaps around plumbing and fixtures, and any cracks or seams in the building's foundation.

STEP 2: SELECT THE RIGHT PRODUCT

Use d-CON snap and glue traps in the kitchen, bathroom, bedroom, and living rooms areas where traps can be safely placed.

Use d-CON baits in the attic, behind appliances, and out of reach spaces in basement, garage, and shed. For the rooms your family spends the LEAST time in: Use d-CON baits in the attic, behind appliances, and out of reach spaces in basement, garage, and shed.

STEP 3: APPLY PRODUCT

Always wear gloves when handling bait. (For mice: Place 1-2 bait packs about 8 to 12 feet apart) (For rats: Place 4-16 bait packs about 15 to 30 feet apart) behind appliances, heavy furniture, in attics and crawl spaces, and other concealed places where (house mice) (and) (rats) are active. **DO NOT** use in areas that children or pets can reach.

STEP 4: MONITOR

If packets are not touched after 3 days, then move them to a new area where (mice) (and) (rats) are active. Once the (mice) (and) (rats) start eating the bait, maintain a supply for 7 days. Then, remove any uneaten bait and dispose according to directions.

Repeat application after 7 days if (mice) (and) (rats) are still present.

12 OZ BOX-BACK LABEL

~~**SELECTION OF TREATMENT AREAS:** Determine areas where rats or mice will most likely find and consume the bait. Generally, these are along walls, by gnawed openings, in or beside burrows, in corners and concealed places, between floors and walls, or in locations where rodents or signs of rodents have been seen. Remove as much alternative food as possible. Use tamper-resistant bait stations wherever necessary (see "**IMPORTANT:**").~~

APPLICATION DIRECTIONS:

~~The amount of bait contained in the trays in this box is unlikely to be sufficient to kill more than 3 to 12 rats. More than one box may be needed to control larger infestations.~~

~~**To Control Norway and Roof Rats:** Use 1 - 4 opened trays per placement. Space placements at intervals of 15 - 30 feet in infested areas. If trays are not fed from for 5 consecutive days, relocate them to other places where rat activity exists and where placements consistent with the requirements of this label can be made. Maintain an uninterrupted supply of fresh bait for at least 10 days.~~

~~**To Control House Mice:** Open tray and apply 1/4 - 1/2 oz. (1 - 2 level tablespoons) of bait at 8 to 12 foot intervals in infested areas. Larger placements (up to 2 ounces) may be needed at points of extremely high mouse activity. Maintain a supply of fresh bait for at least 15 days.~~

~~Check bait locations every 2 days for signs of feeding. Replenish bait if more than 1/2 of the original amount has been removed by rodents. Replace contaminated or spoiled bait immediately if rodent activity is still evident. Collect and dispose of all dead animals and leftover bait properly. To prevent reinfestation, limit sources of rodent food, water and harborage as much as possible. If reinfestation does occur, repeat treatment. Where a continuous source of infestation is present, establish permanent bait stations and replenish as needed.~~

12 OZ BOX-BACK LABEL

PRECAUTIONARY STATEMENTS:

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: May be harmful if swallowed. ~~Keep away from humans, domestic animals, and pets. Wash hands after handling bait. Wear gloves if bait or dead animal may be handled. This product may reduce the clotting ability of the blood and cause bleeding.~~

ENVIRONMENTAL HAZARDS: This product is toxic to fish, birds and wildlife. NEVER APPLY OUTDOORS. Poisoned rodents can be harmful to predators. Do not apply directly to water.

FIRST AID

Have this label with you when obtaining treatment advice.

In case of emergency, call toll free 1-800-338-6167. HOT LINE NUMBER: 1-800-228-4722

IF SWALLOWED

If swallowed by human, pet or animal

- ~~• Call a Poison Control Center or doctor immediately for treatment advice.~~
- ~~• Have person sip a glass of water if able to swallow. Do not induce vomiting until told to do so by a Poison Control Center or doctor.~~
- ~~• Do not give anything by mouth to an unconscious person.~~

Immediately call 1-800-338-6167 to speak to a medical or veterinary professional. Assistance is available 24hr/day.

NOTE TO PHYSICIAN AND VETERINARIAN

Contains Difethialone, an anticoagulant. For humans or dogs that have ingested this product or have obvious poisoning symptoms (bleeding) or elevated prothrombin times, give Vitamin K1 by intramuscular or oral administration. Check prothrombin time every 3 days until values return to normal.

~~**ENVIRONMENTAL HAZARDS:** This product is toxic to fish, birds and wildlife. Predatory and scavenging mammals and birds might be poisoned if they feed upon animals that have eaten the bait. Do not apply directly to water.~~

STORAGE AND DISPOSAL

PESTICIDE STORAGE: Store in original container in a dry place inaccessible to children and pets.

PESTICIDE DISPOSAL: **If empty:** Non-refillable container. Do not reuse or refill container. Place in trash or offer for recycling if available. **If partly filled:** Call your local solid waste agency for disposal instructions. Never place unused products down any indoor or outdoor drains.

NOTICE TO BUYER AND USER: Buyer and User assume all responsibility for safety and risk associated with any use not in accordance with directions. TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, SELLER SHALL NOT BE LIABLE FOR CONSEQUENTIAL, SPECIAL OR INDIRECT DAMAGES RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT AND SELLER'S SOLE LIABILITY AND BUYER'S AND USER'S EXCLUSIVE REMEDY SHALL BE LIMITED TO THE REFUND OF THE PURCHASE PRICE.

Re: d-CON® Mouse-Prufe III (EPA Reg. No. 3282-85); d-CON® Bait Pellets III (EPA Reg. No. 3282-86); **d-CON® Ready Mixed Baitbits III (EPA Reg. No. 3282-87);** d-CON® Bait Packs III (EPA Reg. No. 3282-88)

Fast-track label amendments to simplify directions for use, precautionary statements, and other language

Dear Mr. Hebert:

With this letter, Reckitt Benckiser (Reckitt) is submitting fast track label amendments for the above referenced products (four products). These label amendments are to revise the labeling to make the labels simple and easy to read and understand. These changes will further reduce the opportunities for accidental exposures to children, pets and non-target wildlife from these products, thus addressing the concerns EPA identified in the Agency's Draft Notice of Intent to Cancel dated November 2, 2012, and rendering a final Notice of Intent to Cancel unnecessary. Accordingly, I am also requesting that these label amendments be approved with the requested changes, in accordance with 40 CFR §152.112, without conditions or limitations and on an expedited basis. If the Agency does not intend to approve these amendments without conditions, we ask that you notify us immediately and in writing in accordance with 40 CFR §152.118.

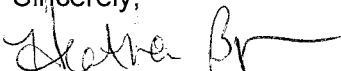

Lastly, all sublabels have been combined into one master label to remove the redundancy in the previously approved label versions.

You will find the following included with this amendment:

- 1) Amendment application form,
- 2) One redline version of the proposed label, and
- 3) One clean version of the proposed label.

Please do not hesitate to contact me with any questions and/or concerns at (973) 404-2995 or via e-mail: heather.bjornson@rb.com.

Sincerely,

A handwritten signature in black ink, appearing to read 'Heather Bjornson', with a stylized flourish at the end.

Heather R. Bjornson
Senior Regulatory Associate

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

DO NOT USE OR STORE

**✗ WHERE CHILDREN
OR PETS CAN REACH!**

✗ OUTDOORS!

**✗ NEAR HUMAN
OR ANIMAL FOOD!**

**{FINAL PRINTED LABEL TO INCLUDE PICTOGRAMS SHOWING PROPER PLACEMENT INDOORS,
BEHIND APPLIANCES, IN ATTICS AND OTHER PLACES WHERE CHILDREN AND PETS DO NOT
HAVE ACCESS}**

Steps to Effective Home Rodent Control

An overall program to eliminate (house mice) (and) (rats) and keep them from returning:

STEP 1: PLAN and PREPARE:

- Eliminate Food Sources: remove garbage, food, and other materials that can shelter or feed mice.**
- Keep (mice) (and) (rats) out: Seal cracks and openings in building and walls where (mice) (and) (rats) can get in especially openings in walls, gaps around plumbing and fixtures, and any cracks or seams in the building's foundation.**

STEP 2: SELECT THE RIGHT PRODUCT

Use d-CON snap and glue traps in the kitchen, bathroom, bedroom, and living rooms areas where traps can be safely placed.

Use d-CON baits in the attic, behind appliances, and out of reach spaces in basement, garage, and shed. For the rooms your family spends the LEAST time in: Use d-CON baits in the attic, behind appliances, and out of reach spaces in basement, garage, and shed.

STEP 3: APPLY PRODUCT

Always wear gloves when handling bait. (For mice: Place 1-2 bait packs about 8 to 12 feet apart) (For rats: Place 4-16 bait packs about 15 to 30 feet apart) behind appliances, heavy furniture, in attics and crawl spaces, and other concealed places where (house mice) (and) (rats) are active. **DO NOT** use in areas that children or pets can reach.

STEP 4: MONITOR

If packets are not touched after 3 days, then move them to a new area where mice (or rats) are active. Once the mice (and) (or) (rats) start eating the bait, maintain a supply for 7 days. Then, remove any uneaten bait and dispose according to directions.

Repeat application after 7 days if (house mice) (and) (or) rats) are still present.

IMPORTANT: ~~Do not expose children, pets, or other nontarget animals to rodenticides. To help prevent accidents:~~

- ~~1. Store product not in use in a location out of reach of children and pets.~~
- ~~2. Apply bait in locations out of reach of children, pets, domestic animals and nontarget wildlife, or in tamper-resistant bait stations. These stations must be resistant to destruction by children under six years of age and must be used in a manner that prevents such children from reaching into bait compartments and obtaining bait. If bait can be shaken from stations when they are lifted, units must be secured or otherwise immobilized. Even stronger bait stations are needed in areas open to hoofed livestock, raccoons, bears, other potentially destructive animals, or in areas prone to vandalism.~~
- ~~3. Dispose of product container, and unused, spoiled, and unconsumed bait as specified on this label.~~

USE RESTRICTIONS:

~~This product may only be used to control house mice only in the sites identified below.~~

- ~~In **URBAN AREAS**, this product may only be used in and around homes; in and around industrial, commercial and public buildings; and in transport vehicles (ships, trains, aircraft) and in and around related port or terminal buildings. All applications “around” buildings must~~
- ~~be made in tamper-resistant bait stations placed along the walls or other external parts of buildings (e.g. doorways, ramps, loading docks) where mice might seek to gain entrance. Do not use in sewers.~~
- ~~In **NON-URBAN AREAS**, this product may only be used inside of homes and agricultural buildings.~~

~~Do not place bait in areas where there is a possibility of contaminating food or surfaces that come in direct contact with food. Do not broadcast bait.~~

1.0 oz. Bait Pack—Back Panel (Mice only)

SELECTION OF TREATMENT AREAS: ~~Determine areas where mice will most likely find and consume the bait. Generally, these are along walls, by gnawed openings, in or beside burrows, in corners and concealed places, between floors and walls, or in locations where rodents or signs of rodents have been seen. Remove as much alternative food as possible. Use tamper-resistant bait stations wherever necessary (see "IMPORTANT:").~~

APPLICATION DIRECTIONS:

To Control House Mice: ~~Use one bait per placement. Space placements at intervals of 8 to 12 feet. 2 bait packs may be used at points of extremely high mouse activity. Maintain a supply of fresh bait for at least 15 days. Check bait locations every 2 days for signs of feeding. Replenish bait if more than 1/2 of the original amount has been removed by rodents. If bait packs are not fed from for 5 consecutive days, relocate them to other places where rodent activity exists and where placements consistent with the requirements of this label can be made. Collect and dispose of all dead animals and leftover bait properly. To discourage reinfestation, limit sources of rodent food, water and harborage as much as possible. If reinfestation does occur, establish permanent bait stations and replenish as needed.~~

1.0 oz. Bait Pack—Back Panel (Mice only)

-PRECAUTIONARY STATEMENTS:

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: May be harmful if swallowed. ~~Keep away from humans, domestic animals, and pets. Wash hands after handling bait. Wear gloves if bait or dead animals may be handled. This product may reduce the clotting ability of the blood and cause bleeding.~~

ENVIRONMENTAL HAZARDS: This product is toxic to fish, birds and wildlife. NEVER APPLY OUTDOORS. Poisoned rodents can be harmful to predators. Do not apply directly to water.

FIRST AID

Have this label with you when obtaining treatment advice. In case of emergency, call toll free 1-800-338-6167.

IF SWALLOWED

If swallowed by human, pet or animal

- ~~Call a Poison Control Center or doctor immediately for treatment advice.~~
- ~~Have person sip a glass of water if able to swallow. Do not induce vomiting until told to do so by a Poison Control Center or doctor.~~
- ~~Do not give anything by mouth to an unconscious person.~~

Immediately call 1-800-338-6167 to speak to a medical or veterinary professional. Assistance is available 24hr/day.

NOTE TO PHYSICIAN AND VETERINARIAN

Contains Difethialone, an anticoagulant. For humans or dogs that have ingested this product or have obvious poisoning symptoms (bleeding) or elevated prothrombin times, give Vitamin K1 by intramuscular or oral administration. Check prothrombin time every 3 days until values return to normal.

~~**ENVIRONMENTAL HAZARDS:** This product is toxic to fish, birds and wildlife. Predatory and scavenging mammals and birds might be poisoned if they feed upon animals that have eaten the bait. Do not apply directly to water.~~

STORAGE AND DISPOSAL

PESTICIDE STORAGE: Store in original container in a dry place inaccessible to children and pets.

PESTICIDE DISPOSAL: If empty: Non-refillable container. Do not reuse or refill container.

If partly filled: Call your local solid waste agency for disposal instructions. Never place unused products down any indoor or outdoor drains.

NOTICE TO BUYER AND USER: Buyer and User assume all responsibility for safety and risk associated with any use not in accordance with directions. TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, SELLER SHALL NOT BE LIABLE FOR CONSEQUENTIAL, SPECIAL OR INDIRECT DAMAGES RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT AND SELLER'S SOLE LIABILITY AND BUYER'S AND USER'S EXCLUSIVE REMEDY SHALL BE LIMITED TO THE REFUND OF THE PURCHASE PRICE.

~~-20/1.0 oz. Bait Pack Outer Box BACK LABEL~~

~~DIRECTIONS FOR USE~~

~~It is a violation of Federal law to use this product in a manner inconsistent with its labeling.~~

~~READ THIS LABEL: Read this entire label and follow all use directions and use precautions.~~

~~IMPORTANT: Do not expose children, pets, or other non target animals to rodenticides. To help prevent accidents:~~

~~1. Store product not in use in a location out of reach of children and pets.~~

~~2. Apply bait in locations out of reach of children, pets, domestic animals and nontarget wildlife, or in tamper-resistant bait stations. These stations must be resistant to destruction by children under six years of age and must be used in a manner that prevents such children from reaching into bait compartments and obtaining bait. If bait can be shaken from stations when they are lifted, units must be secured or otherwise immobilized. Even stronger bait stations are needed in areas open to hooved livestock, raccoons, bears, other potentially destructive animals, or in areas prone to vandalism.~~

~~3. Dispose of product container, and unused, spoiled, and unconsumed bait as specified on this label.~~

~~USE RESTRICTIONS:~~

~~This product may be used to control Norway Rats, Roof Rats and house mice only in the sites identified below.~~

~~-In URBAN AREAS, this product may only be used in and around homes; in and around industrial, commercial and public buildings; and in transport vehicles (ships, trains, aircraft) and in and around related port or terminal buildings. All applications "around" buildings must be made in tamper-resistant bait stations placed along the walls or other external parts of buildings (e.g. doorways, ramps, loading docks) where rats or mice might seek to gain entrance. Do not use in sewers.~~

~~-In NON-URBAN AREAS, this product may only be used inside of homes and agricultural buildings.~~

~~Do not place bait in areas where there is a possibility of contaminating food or surfaces that come in direct contact with food. Do not broadcast bait.~~

~~20/1.0 oz. Bait Pack Outer Box — BACK LABEL~~

~~SELECTION OF TREATMENT AREAS: Determine areas where rats or mice will most likely find and consume the bait. Generally, these are along walls, by gnawed openings, in or beside burrows, in corners and concealed places, between floors and walls, or in locations where rodents or signs of rodents have been seen. Remove as much alternative food as possible. Use tamper resistant bait stations wherever necessary (see "IMPORTANT:").~~

~~To Control Norway and Roof Rats: Use 4-16 bait packs per placement. Space placements at intervals of 15-30 feet in infested areas. Maintain an uninterrupted supply of fresh bait for at least 10 days.~~
~~To Control House Mice: Use one bait pack per placement. Space placements at intervals of 8 to 12 feet. 2 bait packs may be used at points of extremely high mouse activity. Maintain a supply of fresh bait for at least 15 days.~~

~~FOR RATS and MICE: Check bait locations every 2 days for signs of feeding. Replenish bait if more than 1/2 of the original amount has been removed by rodents. If bait packs are not fed from for 5 consecutive days, relocate them to other places where rodent activity exists and where placements consistent with the requirements of this label can be made. Collect and dispose of all dead animals and leftover bait properly. To discourage reinfestation, limit sources of rodent food, water and harborage as much as possible. If reinfestation does occur, establish permanent bait stations and replenish as needed.~~

~~20/1.0 oz bait pack outer box — BACK LABEL~~

~~PRECAUTIONARY STATEMENTS:~~

~~HAZARDS TO HUMANS AND DOMESTIC ANIMALS~~

~~CAUTION: May be harmful if swallowed. Keep away from humans, domestic animals, and pets. Wash hands after handling bait. Wear gloves if bait or dead animal may be handled.~~

~~FIRST AID~~

~~Have this label with you when obtaining treatment advice.~~

~~HOT LINE NUMBER: 1-800-228-4722~~

~~IF SWALLOWED~~

- ~~• Call a Poison Control Center or doctor immediately for treatment advice.~~
- ~~• Have person sip a glass of water if able to swallow. Do not induce vomiting until told to do so by a Poison Control Center or doctor.~~
- ~~• Do not give anything by mouth to an unconscious person.~~

~~NOTE TO PHYSICIAN AND VETERINARIAN~~

~~Contains Difethialone, an anticoagulant. For humans or dogs that have ingested this product or have obvious poisoning symptoms (bleeding) or elevated prothrombin times, give Vitamin K1 by intramuscular or oral administration. Check prothrombin time every 3 days until values return to normal.~~

~~ENVIRONMENTAL HAZARDS: This product is toxic to fish, birds and wildlife. Predatory and scavenging mammals and birds might be poisoned if they feed upon animals that have eaten the bait. Do not apply directly to water.~~

~~STORAGE AND DISPOSAL~~

~~STORAGE: Store in original container in a dry place inaccessible to children and pets.~~

~~DISPOSAL: If empty: Non-refillable container. Do not reuse or refill container.~~

~~If partly filled: Call your local solid waste agency for disposal instructions. Never place unused products down any indoor or outdoor drains.~~

~~NOTICE TO BUYER AND USER: Buyer and User assume all responsibility for safety and risk associated with any use not in accordance with directions. TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, SELLER SHALL NOT BE LIABLE FOR CONSEQUENTIAL, SPECIAL OR INDIRECT DAMAGES RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT AND SELLER'S SOLE LIABILITY AND BUYER'S AND USER'S EXCLUSIVE REMEDY SHALL BE LIMITED TO THE REFUND OF THE PURCHASE PRICE.~~

~~Important: For Direction for use and first aid instruction in Spanish, please call 1-866-648-1819~~

Fast-track label amendments to simplify directions for use, precautionary statements, and other language

Dear Mr. Hebert:

With this letter, Reckitt Benckiser (Reckitt) is submitting fast track label amendments for the above referenced products (four products). These label amendments are to revise the labeling to make the labels simple and easy to read and understand. These changes will further reduce the opportunities for accidental exposures to children, pets and non-target wildlife from these products, thus addressing the concerns EPA identified in the Agency's Draft Notice of Intent to Cancel dated November 2, 2012, and rendering a final Notice of Intent to Cancel unnecessary. Accordingly, I am also requesting that these label amendments be approved with the requested changes, in accordance with 40 CFR §152.112, without conditions or limitations and on an expedited basis. If the Agency does not intend to approve these amendments without conditions, we ask that you notify us immediately and in writing in accordance with 40 CFR §152.118.

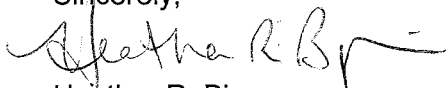

Lastly, all sublabels have been combined into one master label to remove the redundancy in the previously approved label versions.

You will find the following included with this amendment:

- 1) Amendment application form,
- 2) One redline version of the proposed label, and
- 3) One clean version of the proposed label.

Please do not hesitate to contact me with any questions and/or concerns at (973) 404-2995 or via e-mail: heather.bjornson@rb.com.

Sincerely,

A handwritten signature in black ink, appearing to read 'Heather R. Bjornson'.

Heather R. Bjornson
